A Case Report Koreamed

Isolated blunt traumatic injury to the submandibular gland is very rare. In the previous case reports, most patients with isolated submandibular gland injury had a good prognosis without any major complication. We report here a case of deep neck infection due to traumatic isolated submandibular gland fracture with computed tomography findings.

Our book servers hosts in multiple locations, allowing you to get the most less latency time to download any of our books like this one. Kindly say, the a case report koreamed

As the evidence-based medicine movement gathers momentum, it is becoming apparent that valuable information can be derived from individual case studies, provided that the information is structured correctly from the outset. Good clinical reports and case studies must link together several elements of clinical epidemiology, clinimetrics, qualitative research principles and methods for gathering information on individual clinical situations. The first edition of 'Clinical Case Reporting in Evidence-Based Medicine' was timely in its explanations of the theory and practice of choosing and reporting clinical cases: this new edition provides additional coverage on routine case reports in medicine, surgery and psychiatry, case reporting in occupational medicine and in tort litigation at courts of law. This remains an essentially practical book which is a vital companion to any medical professional contributing to research through individual case reports.

This text looks into communicating psychiatric patient histories, from the asylum years to the clinics of modern day. In this study of tales of mental illness, Carol Berkenkotter examines the evolving role of case history narratives in the growth of psychiatry as a medical profession.

Includes chapters by clinicians and researchers that cover nociceptors and pathways, central sensitization, pharmacological and
