Seminar paper from the year 2004 in the subject English Language and Literature Studies - Linguistics, grade: 1.0 (A), University of Heidelberg, course: Second Language Acquisition, 17 entries in the bibliography, language: English, abstract: Interest in second language vocabulary (SLV) significantly increased in the late 1980s and a considerable number of books concerning themselves with it have been published since then. On the other hand, despite this changed condition, curricula in schools are still considering teaching vocabulary a marginal subject: It is scarcely an issue itself and quite often only mentioned casually when dealing with subjects that are thought to be more demanding and important. However, vocabulary is indeed both demanding and important. Thus, SLV research must not become a playground of linguists with little or no effect on the 'real world', which - from a teacher's point of view - is the classroom. The findings of research can make teachers aware of important aspects of vocabulary and help them to impart these aspects in school. Therefore, this paper will take into account what SLV research is actually good for in school routine. A glance at the desired aims and possible restrictions of vocabulary teaching will provide the basis for a further examination of both the implicit and explicit approach, as well as the grey area in between.

In Vocabulary Myths, Keith S. Folse breaks down the teaching of second language vocabulary into eight commonly held myths. In debunking each myth, he introduces the myth with a story based on his 25 years of teaching experience (in the United States and abroad), continues with a presentation of what empirical research has shown on the topic, and finishes with a list of what teachers can do in their classrooms to facilitate true vocabulary acquisition. The goal of Vocabulary Myths is to foster a paradigm shift that correctly views vocabulary as fundamental in any second language learning process and demonstrates that research supports this goal-that in fact there is a wealth of empirical evidence to support these views. In addition, an important theme is that teachers have overestimated how much vocabulary students really understand, and as a result, the so-called "comprehensible input" is neither comprehensible nor input. The second language vocabulary acquisition myths reexamined in this book are: "In learning another language, vocabulary is not as important as grammar or other areas."Using word lists to learn L2 vocabulary is unproductive. "Presenting new vocabulary in semantic sets facilitates learning. "The use of translations to learn new vocabulary should be discouraged. "Guessing words from context is an excellent strategy for learning L2 vocabulary. "The best vocabulary learners make use of one or two really specific vocabulary learning strategies. "The best dictionary for L2 learners is a monolingual dictionary. "Teachers, textbooks, and curricula cover L2 vocabulary adequately.

NATIONAL BESTSELLER• For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages." —Gary Marcus, cognitive psychologist and author of the New York Times bestseller Guitar Zero At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Written by two top vocabulary specialists, this updated edition gives a state-of-the-art introduction to vocabulary teaching and testing.

In addition, an important theme is that teachers have overestimated how much vocabulary students really understand, and as a result, the so-called "comprehensible input" is neither comprehensible nor input. The second language vocabulary acquisition myths reexamined in this book are: "In learning another language, vocabulary is not as important as grammar or other areas."Using word lists to learn L2 vocabulary is unproductive. "Presenting new vocabulary in semantic sets facilitates learning. "The use of translations to learn new vocabulary should be discouraged. "Guessing words from context is an excellent strategy for learning L2 vocabulary. "The best vocabulary learners make use of one or two really specific vocabulary learning strategies. "The best dictionary for L2 learners is a monolingual dictionary. "Teachers, textbooks, and curricula cover L2 vocabulary adequately.

NATIONAL BESTSELLER• For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages." —Gary Marcus, cognitive psychologist and author of the New York Times bestseller Guitar Zero At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Written by two top vocabulary specialists, this updated edition gives a state-of-the-art introduction to vocabulary teaching and testing.

This book provides pedagogical suggestions for both teachers and learners.

Providing a detailed survey of research and theory on the teaching and learning of vocabulary, Paul Nation also describes what vocabulary learners need to know to be effective language users.

An updated edition of the key reference work in the area of second and foreign language vocabulary studies. This book provides a detailed survey of research and theory on the teaching and learning of vocabulary with the aim of providing pedagogical suggestions for both teachers and learners. It contains descriptions of numerous vocabulary learning strategies which are justified and supported by reference to experimental research, case studies, and teaching experience. It also describes what vocabulary learners need to know to be effective language users. This title shows that by taking a systematic approach to vocabulary learning, teachers can make the best use of class time and help learners get the best return for their learning effort.

Seminar paper from the year 2004 in the subject English Language and Literature Studies - Linguistics, grade: 1.0 (A), University of Heidelberg, course: Second Language Acquisition, 17 entries in the bibliography, language: English, abstract: Interest in second language vocabulary (SLV) significantly increased in the late 1980s and a considerable number of books concerning themselves with it have been published since then. On the other hand, despite this changed condition, curricula in schools are still considering teaching vocabulary a marginal subject: It is scarcely an issue itself and quite often only mentioned casually when dealing with subjects that are thought to be more demanding and important. However, vocabulary is indeed both demanding and important. Thus, SLV research must not become a playground of linguists with little or no effect on the 'real world', which - from a teacher's point of view - is the classroom. The findings of research can make teachers aware of important aspects of vocabulary and help them to impart these aspects in school. Therefore, this paper will take into account what SLV research is actually good for in school routine. A glance at the desired aims and possible restrictions of vocabulary teaching will provide the basis for a further examination of both the implicit and explicit approach, as well as the grey area in between.

In Vocabulary Myths, Keith S. Folse breaks down the teaching of second language vocabulary into eight commonly held myths. In debunking each myth, he introduces the myth with a story based on his 25 years of teaching experience (in the United States and abroad), continues with a presentation of what empirical research has shown on the topic, and finishes with a list of what teachers can do in their classrooms to facilitate true vocabulary acquisition. The goal of Vocabulary Myths is to foster a paradigm shift that correctly views vocabulary as fundamental in any second language learning process and demonstrates that research supports this goal-that in fact there is a wealth of empirical evidence to support these views. In addition, an important theme is that teachers have overestimated how much vocabulary students really understand, and as a result, the so-called "comprehensible input" is neither comprehensible nor input. The second language vocabulary acquisition myths reexamined in this book are: "In learning another language, vocabulary is not as important as grammar or other areas."Using word lists to learn L2 vocabulary is unproductive. "Presenting new vocabulary in semantic sets facilitates learning. "The use of translations to learn new vocabulary should be discouraged.
