Luc Ferry's *A Brief History of Thought* (2011) is a very pretty piece of humanism in which he notes that philosophy is a search for salvation. The author surveys five major eras, or "great moments," of thought: early Greek dominance, the Christian middle ages, the Enlightenment that birthed modern philosophy, postmodernity, and the present stage "after deconstruction."

All the great ideals that gave life meaning in earlier societies - God, the nation, revolution, freedom, democracy - are in disarray today, questioned by many and rejected by those who have lost faith in them. But there is another value, rooted in the birth of the modern family and in the passage from traditional to modern marriage, that has transformed our lives in profound and often unrecognized ways: love. It affects not only our personal lives but many aspects of our social and collective life too, from art and education to politics. In this book Luc Ferry shows how the quiet rise of love as the central value in modern societies has created a new principle of meaning and a new definition of the good life that requires a completely different kind of philosophical thinking. It forms the basis for a new philosophy for the twenty-first century and a new kind of humanism for the modern world - not a humanism of reason and rights, but a humanism of solidarity and sympathy. The ideal that this new humanism realizes is no longer that of nationalisms and revolutions, of the perpetrating of organized violence in the name of deadly principles that are pursued over and above humanity. Rather, it is about preparing and ensuring a future for those we love most: our future generations.

Peter Kreeft believes that Baise Pascal is the first post-medieval apologist. No writer

in history, claims Kreeft, is a more effective Christian apologist and evangelist to today's uprooted, confused, secularized pagans (inside and outside the Church) than Pascal. He was a brilliant man--a great scientist who did major work in physics and mathematics, as well as an inventor--whom Kreeft thinks was three centuries ahead of his time. His apologetics found in his *Pensees* are ideal for the modern, sophisticated skeptic.

The post-Christian world we inhabit today presents us with a mundane and disenchanting view of reality. Under the sway of materialism and science, we have been left with a way of seeing, thinking, and living that has no place for beauty and wonder. We now live in a world bereft of magic and mystery. Many--including many Christians--no longer perceive the world in its proper light. As a result, the Christian imagination is muted. Moreover, the church has grown anti-intellectual and sensate, out of touch with the relevancy of Jesus and how to relate the gospel to all aspects of contemporary life. As a result, the Christian voice is muted. In this age Christian wholeness remains elusive, blunting the church's ability to present a winsome and compelling witness for faith. As a result, the Christian conscience is muted. Cultural Apologetics addresses this malaise

by setting forth a fresh model for cultural engagement, rooted in the biblical account of Paul's speech on Mars Hill, which details practical steps for reestablishing the Christian voice, conscience, and imagination. Readers will be equipped to see, and help others see, the world as it is--deeply beautiful, mysterious, and sacred. With creative insights, Cultural Apologetics prepares readers to share a vision of the Christian faith that is both plausible and desirable, offering clarity for those who have become disoriented in the haze of modern Western culture.

Because contemporary political philosophy owes a significant debt to the great nineteenth-century German philosophies of history, a sound knowledge of German Idealist philosophy is crucial to an understanding of our own time. In Political Philosophy 2, Luc Ferry provides not only a thorough introduction to German Idealism and its critics, but also an insightful look at contemporary political philosophy. Ferry begins this second volume of his ambitious three-volume Political Philosophy by considering both the structure and the potential political effects of the various philosophies of history born of German Idealism. He focuses on the key question of whether, and to what extent, the principle of reason may be said to govern the totality of the historically real. This leads to an

examination of Hegel's criticism of the moral view of the world and to an assessment of the phenomenological criticism of Hegel put forth by Heidegger and Arendt.

The practice of offering reasons for the Christian faith, or apologetics, strikes many unbelievers today as offensive, an attempt to proselytize, while Christians themselves often view apologetics as unsophisticated or even faith-undermining. After all, shouldn't a believer focus on presenting the gospel rather than attempting to argue people to belief? In *Telling a Better Story*, author Joshua Chatraw presents a new and better way to do apologetics, an inside-out approach that is attuned to our late-modern moment and respectful of unbelievers, all the while remaining focused on Jesus. With chapters on cultural understanding, dealing with the difficult issues, and presenting Jesus in a holistic, contextual manner, *Telling a Better Story* offers a roadmap to effective apologetics both for experienced apologists and those new to sharing their faith with others.

Can we all agree on some things about Jesus, regardless of our belief--or unbelief? Perhaps surprisingly, there is a lot upon which all scholars can agree. When surveying historical scholarship, there are certain truths about Jesus that Christians, agnostics, and skeptics must affirm. In *The*

Bedrock of Christianity, Justin Bass shows how--regardless of one's feelings about Christianity--there lies a bedrock of truths about Jesus's life and ministry that are held by virtually all scholars of religion. Through an examination of each of these key facts, readers will encounter the unalterable truths upon which everyone can agree. Useful for both Christians and non-Christians alike, this study demonstrates what we can really know about the historical truth of Jesus' death and resurrection.

Amid the pluralism and secularism of Western culture, Christian apologetics has experienced a renewal of interest. In *Apologetics at the Cross*, Joshua D. Chatraw and Mark D. Allen provide an introduction to the field, acquainting students and lay learners with the rich history, biblical foundation, and ongoing relevance of apologetics. Unique in its approach, *Apologetics at the Cross* presents the biblical and historical foundations for apologetics, explores various contemporary methods for approaching apologetics, and gives practical guidance in "how to" chapters that feature many real-life illustrations. With their respectful approach, which pays special attention to the attitude and posture of the apologist, Chatraw and Allen equip Christians to engage skeptics with the heart as well as the mind. Conversational in tone and balanced in approach, *Apologetics at the*
