Gentlemen, I have several reloading manuals, most of the major ones actually. Is there a manual that has more cast loads in it? I have the lyman cast volume 4, however it does not have many lee molds in it. Right now I only have lee molds because they are cheap and seem relatively easy to use. Does the new 2020 lee manual cover the molds they make?

Welcome to the new Castpics Load lookup. This database has 6400 loads for cast bullet loads. Data can be searched by cartridge name, powder name, and bullet weight. You may wish to peruse the list of cartridges first as many times the difference in 45-70 and 45/70 may mean finding data or drawing a blank. Remember that all data was safe at the time it was tested, but this does not mean it is safe in your firearm.

HP-38 is the same exact powder as Winchester 231, and Lyman lists loads for 231 with the 175 gr. cast bullet. Just use that and you'll be fine, but of course work up your load as normal. Both Win. 231 and Hodgdon HP-38 are quite a bit slower burning powders than Bullseye, VThillman, not the other way around. Hope this helps. Fred

"A deeply meaningful collection that navigates important nuances of identity."—Kirkus Reviews, starred review *Nepantla Familias* brings together Mexican American narratives that explore and negotiate the many permutations of living in between different worlds—how the authors or their characters create, or fail to create, a cohesive identity amid the contradictions in their lives. *Nepantla*—or living in the in-between space of the borderland—is the focus of this anthology. The essays, poems, and short stories explore the in-between moments in Mexican American life—the family dynamics of living between traditional and contemporary worlds, between Spanish and English, between cultures with traditional and shifting identities. In times of change, family values are either adapted or discarded in the quest for self-discovery, part of the process of selecting and composing elements of a changing identity. Edited by award-winning writer and scholar Sergio Troncoso, this anthology includes works from familiar and acclaimed voices such as David Dorado Romo, Sandra Cisneros, Alex Espinoza, Reyna Grande, and Francisco Cantú, as well as from important new voices, such as Stephanie Li, David Dominguez, and ire'ne lara silva. These are writers who open and expose the in-between places: through or at borders; among the past, present, and future; from tradition to innovation; between languages; in gender; about the wounds of the past and the victories of the present; of life and death. *Nepantla Familias* shows the quintessential American experience that revives important foundational values through immigrants and the children of immigrants. Here readers will find a glimpse of contemporary Mexican American experience; here, also, readers will experience complexities of the geographic, linguistic, and cultural borders common to us all.

Do you want to get started in Handloading your own ammunition, but need a step-by-step guide that does a little better at explaining why you're doing things? Just need a little overview on the basic steps before you start buying gear? Need some guidance on what all this stuff is supposed to do for you? This booklet might help you out! At least, I hope it will...It's supposed to. This book will not give you loads for your particular cartridge - there are hundreds of other books for that. This book will give you the basics, and help you understand the actual mechanics of cleaning, depriming, sizing, trimming, powder measuring, and seating a bullet.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

If you've ever wanted to reload ammunition but didn't know where to start this book is for you. You'll find detailed chapters about primers, cartridge cases, gun powder, and bullets, explaining in layman's terms what they are, variations you'll encounter and the characteristics of each. You'll also learn the different facets of case preparation: which are necessary and which are optional, and how to do them. You'll learn some characteristics of gunpowder and which types work best with bulk measurements. There'll be detailed photos and explanations teaching the process of reloading ammunition. From there you'll be shown how you can gear up to reload your own ammunition even if you don't have much money or space. Although most of the book is geared toward metallic cartridge reloading there's also a chapter on reloading shotgun ammunition. It too, will show you the steps involved and how to become operational with very little money and minimal space requirements. After reading this book the novice reloader will: (a) be capable of making informed choices when purchasing their equipment and components; (b) be able to understand the reloading process and why certain steps are taken or omitted; (c) have a safe, profitable and enjoyable experience from the very beginning.

Provides an updated catalog and reference section, thousands of full-color and black-and-white photographs, new product reports that cover a wide range of topics, and current feature articles. Original.
