That's Not What I Meant!: How Conversational Style Makes ...

You meant to say something or agree to something, but the "other side" didn't hear it that way. That's enough for a customer to walk away forever. That's enough for a lawsuit. Because denying the experience of the other person doesn't open the door for re-connection. Forward motion is possible if we can extend the sentence to, "That's not what I meant, but that must be what you heard, how do we fix this?"

THAT'S NOT WHAT I MEANT! How Conversational Style Makes or Breaks Relationships Often it's not what you say but how you say it. The part of the country you come from, your ethnic background, age, class, gender, and individual personality - these and many other influences result in different habits and assumptions about how to say what you mean.

In THAT'S NOT WHAT I MEANT!, Dr. Tannen shows that growing up in different parts of the country, having different ethnic and class backgrounds, even age and individual personality, all contribute to different conversational styles. Entertaining and informative, this is an essential complement to psychological theories of human behavior.

This exchange is one example that can represent a real problem in how businesses define success. Other signals sound like this: "That's the wrong process," "That's not what I meant," or "That's not how it's done." What all these have in common is a lack of clear operational definitions.

“I didn’t mean it like that. That’s not how I meant to come across.” Clear communication and apologizing to others when appropriate is good, but there’s something else that is even more important. In 1 John 1:5-7, it says, “God is light and in Him is no darkness at all.” But if we walk in the light as He is in the light, we have fellowship with one another, and the blood of Jesus Christ His Son cleanses us from all sin.
